EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears bellow. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Holmes W. Anderson (Reg. 37,272) on January 4, 2005.

In the Claims:

Cancel claims 12-25, 28-48 and 56-58.

Deleting the previous claim 59, replace it with the newly amended claim 59. See attachment for details.

Reasons for allowance

3. The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention distinguished over the prior art for the following reasons. The claims are allowable over the prior art of record because none of the references, either alone or in combination, discloses or renders obvious the method for intercepting a location update message at a corresponding agent for a correspondent host, binding an address of the mobile node and forming a tunnel for messages to the mobile node in order to avoid the home agent of the mobile node.

Art Unit: 2154

Conclusion

4. Any comments considering necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (571) 272-3965. The examiner can normally be reached on M-F (8:00 am – 5:00 pm) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A. Follansbee, can be reached on (571) 272-3964. The fax number for Group 2100 is (703) 872-9306.

Any inquiry of a general nature or relating to the status of the application should be directed to the Group receptionist at (703) 305-3900.

59. (currently amended) A computer program product for use in a border router in a domain where a mobile node is remote from the mobile node's home agent, the computer program product comprising a computer usable medium having computer program code thereon, said computer program code comprising:

program code for binding an address of the mobile node with a first care of address;

program code for intercepting a location update message from the mobile node;

program code for revising the binding to replace the first care of address with a second care of address received in the location update message; and

program code for terminating the location update message, wherein the router is a correspondent agent for a correspondent host and wherein the act of binding forms a tunnel for messages to the mobile node that avoids a home agent of the mobile node.
